**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

"So God created human beings in his own image. In the image of God he created them; male and female he created them." Genesis 1:27. This cannot be changed. I do not think that allowing people to change driver's license gender at will is okay. There are only two types of humans; Male and Female and it is based on the chromosomes XY and XX. That is how identification should be done.

Dear BMV,

As a longtime Indiana resident I am disturbed that you are even considering caving into political agendas by a very small and vocal group of activists by considering allowing self-identification of gender on driver's licenses. This is still classified as a mental disorder and no matter what I choose to believe about myself, if it isn't reality then it is a mental sickness and should be treated. Allowing this only enable further problems. I would also add that if you allow this then people should be able to just change any attribute. I should be able to identify as 8 feet tall, or have blue eyes, or even change my address to one that is not real, just because I say it is where I feel like I live. How would that impact law enforcement or medical care? This is a ridiculous agenda that has serious consequences for both our society and our own ability to deal with reality.

Good morning...

Please discontinue wasting time and resources to consider "Gender X" driver's licenses. The sex on each person is not flexible. If it were, it would not be necessary for a doctor to sign a form attesting so; synthetic chemicals to have effect; or disfiguring surgeries to be applied.

I appreciate your consideration and expect that a wise decision will be made.

Cordially,

Jeff Lehman

I believe allowing false data on Indiana's driver's licenses compromises the integrity of the license and the Indiana DMV

I believe the Indiana BMV should not turn Indiana's most significant form of identification into a tool to advance a political agenda.

There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves.

Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity.

Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.

I believe it is a big mistake to open this Pandora's box that has a potential of leading to more and more alarming agendas.

Since you are taking public comment on the proposed change to allow a person to choose their sex on the drivers licence, I am glad to give you my thoughts.

We are all born either male or female. Our DNA is set and no meddling with drugs or surgery will change that. So it is foolish for the BMV to participate in some peoples foolishness of trying to change what cannot be changed.

Looking for some commonsense here, Mark Torkelson

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. **** _____

It seems very unsafe and inappropriate to have gender identifications on a drivers license that does not reflect the person's actual gender and could be confusing to those needing to check identities using a driver's license. There is way too much identity fraud causing too many people problems to throw that into the fray. Allowing people to put confusing gender information on drivers licenses negates the validity of using a drivers license for identification if it has confusing information on it.

We need to stick with what we have been doing and keep driver's licenses valid for information use. People should not chose gender on a driver's license.

Subject: Gender Neutral Driver's Licenses

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

I am opposed to changing driver's licenses to reflect anything other than a person's sex determined at birth. Driver's licenses are used for identification purposes and include identifying features such as eye color, hair color, height, and weight. A person's sex at birth cannot be changed and can be used to help in identification.

Having a gender neutral choice does nothing to clarify the situation; it only adds to the confusion.

Please reject this social experiment and stick with the facts.

Subject: NO Transgender Licenses

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

I am writing today to express my strong opposition to the proposal to allow transgender individuals to identify their sex on their driver's license as anything other than their biological sex determined at birth. I am opposed for the following reasons:

- There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves.
- Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity.
- Driver's licenses are not supposed to be political statements about lifestyle choices.
- Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.
- Allowing false data on Indiana's driver's licenses compromises the integrity of the license.
- The form to change one's gender has no guidelines for what that means or involves. It is merely a doctor's signature.

The Indiana BMV should not turn Indiana's most significant form of identification into a tool to advance a political agenda.

Sincerely
Ben Houk
Indianapolis, IN

I just did all the documentation for the star on my license. The documents I had to produce to verify who I really was, was extensive. If your proposed changes to accommodate transgender orientation becomes valid, then why did I have to verify my identity so clearly and concisely? I could have just told you who I am that day. You will invalidate the very purpose we carry our license as proof of who we are.

. .
.

Message Start:

Dear Indiana BMV,

I would like to take a moment to voice my displeasure with the decision to move toward Transgender Driver's Licenses in Indiana.

Is this adherence to what a true Driver's License is to be used for and its integrity? The biological Sex of an individual is not something someone can truly change.

Through the millennium we have had two sexes, male and female. A societal norm.

What happens in an emergency when first responders and police really need accurate information?

Requiring a person to identify their true biology from birth does not prevent someone from living out whatever they choose to identify as.

Please reconsider this decision and not have our BMV be a social lab experiment for a particular groups agenda and special interests.

Respectfully

Chris Cottone

In regard to Indiana transgender driver licenses:

There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves. Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity.

Driver's licenses are not supposed to be political statements about lifestyle choices.

Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.

Allowing false data on Indiana's driver's licenses compromises the integrity of the license.

The form to change one's gender has no guidelines for what that means or involves. It is merely a doctor's signature.

The Indiana BMV should not turn Indiana's most significant form of identification into a tool to advance a political agenda.

To Whom It May Concern:

I wanted to take some time out of my day to explain to you why I oppose this proposed rule:

- There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves.
- Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity.
- Driver's licenses are not supposed to be political statements about lifestyle choices.
- Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.
- Allowing false data on Indiana's driver's licenses compromises the integrity of the license and could possibly have negative affects on other legal documents as well.
- The form to change one's gender has no guidelines for what that means or involves. It is merely a doctor's signature.

The Indiana BMV should not turn Indiana's most significant form of identification into a tool to advance a political agenda.

How one chooses to identify oneself should have no effect on any legal document. With over 100 genders, and counting, to identify oneself with, how would law enforcement or emergency personnel truly be able to help a person whose license did not state what their true gender was?

I challenge you today to stop this political campaign and focus on things that truly matter to the people!

Sincerely,

Amanda Contreras

Subject: Comment for Public Record

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

My Comments for the Record:

The Indiana BMV should not turn Indiana's most significant form of identification into a tool to advance a political agenda.

- Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity however they choose.
- Driver's licenses are not supposed to be political statements about lifestyle choices.
- Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.

Revamping the state driver license records to satisfy a handful of sexually confused individuals is a NEEDLESS WASTE of taxpayer dollars, whatever the cost may be, and is totally uncalled for.

Subject: "Gender X" driver's licenses

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Sir/Ma'am,

I understand that Indiana BMV has plans to revamp all driver's licenses to appease a handful of gender confused Hoosiers who want to choose the sex on their license to fit their mental viewpoint.

I also hear that you are accepting public comment on this and wanted to express a few thoughts if you would bear with me.

- There are only 2 biological sexes fixed at conception and unchangeable (because each cell of the body contains an XY or an XX chromosome for one's whole life) regardless of how individuals choose to characterize themselves.
- Requiring a person to identify their true biology from birth does not prevent them from living out a male or female identity.
- Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident. Instead of being bullied by powerful political lobbies maybe we should be more concerned about life and death? And if the argument is made that transgender suicide rate is extraordinarily high, that is somewhat disingenuous since this rate increases after transgender operations are performed, and it can hardly be proven to be exacerbated by a drivers license.
- Driver's licenses are not supposed to be political statements about lifestyle choices.
- Allowing false data on Indiana driver's licenses compromises the integrity of the license. For example, just because I (being male) feel like I am female, should I be able to log that incorrect information any more than say if I feel like I am disabled and yet am not?

Of course there will be a huge amount of pressure to change, in order to be "progressive" and because the voices that urge restraint and consideration have already been cast as "hateful" whether or not they actually are or whether they are merely concerned for the best for everyone. I urge you to be very cautious about going ahead with what may seem to be such a small step.

Thanks you for your consideration.

To whom it may concern:

I wish to pen my disagreement with changing Indiana Driver License to reflect transgender X. I feel that this is an unnecessary change and expense.

Humans are born male & female. Freedom in America allows us to conduct ourselves in a manner that makes us happy-as long as that manner harms no one. Transgenders can dress and conduct themselves as they see fit.

What would be the point of a license change?

Sincerely,

Tonya Hoffmeister

How do you have the authority to change the gender of a Hoosier without a legal order from a judge?

Humans are made in the image of God Almighty. He said he made us male and female. No matter how much a Hoosier driver may be confused about it and no matter how many disfiguring surgeries or chemicals they ingest their DNA tells if they are male or female. Their chromosomes are either XX or XY. There is no other choice. No human or typical bureaucrat can change what has been true since humans were created. Can you invade a body and change the chromosomes mix? Didn't think so!

I am unalterably opposed to changing Indiana driver's licenses to accommodate a handful of mentally confused Hoosiers. Surely there are more important things you can be doing with my tax dollars. Yes I said my tax dollars since my license fees help pay for your folly. I don't really care what these confused people do in their lives. But you are horsing around in my life with this foolish idea. Changing the gender on a driver's license is FRAUD when the person is misgendered from actuality!

Use your brain for once!!

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. **** _____

This is in regards to the proposed rule of having "gender less" driver licenses in Indiana. I strictly oppose this idea. Their are only two biological sexes fixed at conception regardless of how an individual chooses to characterize themselves. Also, emergency medical and law enforcement personnel need to know a persons actual biological sex to perform their duty in the event of an accident. Driver licenses are not supposed to be political statements about life style choices. When I think there are 45 million Indiana drivers licenses issued and only a handful who want a change, why do we cater to the handful? So please do not change Indiana's driver licenses to "Gender X" licenses.

Subject: NO (bold letters) to Gender X Driver's Licenses

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

I was stunned to discover that the Indiana BMV has plans to revamp all driver's licenses to appease the transgender community of which there are likely only 'a handful'. I hate to sound biased or whatever, but come on Indiana ... we are better than that.

It's my understanding that Indiana's BMV has a proposed rule that allows a doctor to simply sign a form attesting that a person has changed their sex from male to female, female to male or either to "X non-binary" as if sex is something fluid or unknown.

One cannot truly change their sex through synthetic chemicals or disfiguring surgeries.

- There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves.
- Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity.
- Driver's licenses are not supposed to be political statements about lifestyle choices.
- Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.
- Allowing false data on Indiana's driver's licenses compromises the integrity of the license.
- The form to change one's gender has no guidelines for what that means or involves. It is merely a doctor's signature.

The Indiana BMV should not turn Indiana's most significant form of identification into a tool to advance a political agenda. If this is what the BMV wants to do, I think it should be something about which Indiana voters have a say. Send the question to ballot box and let us Indiana residents vote yes or no ... as for me ... I VOTE NO!

Hello,

This issue was brought to my attention by the American Family Association. I just wanted to voice my opinion that I think this would be wrong to implement. They brought up several valid points about how it would be wrong to add a third option to our driver's licenses, including:

- There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves.
- Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity.
- Driver's licenses are not supposed to be political statements about lifestyle choices.
- Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.
- Allowing false data on Indiana's driver's licenses compromises the integrity of the license.
- The form to change one's gender has no guidelines for what that means or involves. It is merely a doctor's signature.

I would add to this that (especially with the newer licenses we are going to) all of the forms of proof needed to obtain the new license are very official documents. The resulting document (license) needs to be just as official. So, adding in a point of opinion without legal proof just begins to undermine the document itself. A doctor's note is not a court order. People change their names, but it has to go through the court system.

I also really agree with their 4th bullet point. If the police are trying to find a person or identify a body, then they are going to be looking for the obvious characteristics associated with the information they have.

Thank you for listening and I hope this will cause you to think objectively about this decision.

Thanks,

Jennifer Collingwood

Dear Indiana BMV leadership: We have been made aware our Indiana BMV is considering modifying the Indiana drivers' license to accommodate transgenderism. We strongly oppose this change. We consider deviations from the natural order of creation to be immoral and do not wish our tax dollars to be spent that way. Please drop this idea.

Hello, I do not see how BMV has now become an authority in biology, and has now sought to start enforcing cultural opinions upon the population. It is utter ridiculousness that BMV would start supporting the lie that somehow or another there is anything other than 2 genders, male or female. Historically, mankind has always understood there is only male and female; one look at the plumbing of each person makes that absolutely clear. Thank you. John Jacob.

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. **** _____

Regarding the proposed rule to allow a gender confused Hoosiers to change their driver's license to fit their viewpoint, this is a slippery slope of political correctness that is not necessary.

People are free to live as they choose, requiring them to declare their true biological sex on their license does not prevent or conflict with their lifestyle choice.

There is no need to change Indiana law simply to appease a political cause or the desires of a small activist group.

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

To Whom it May Concern,

I'm writing in support of current policy to identify "male" and "female" only on our licenses. I urge you in the strongest terms...please do not change this policy no matter what other states do or the pressures that are brought to bear. To pass the driver's test it doesn't matter how you feel that day; it matters that you answer questions correctly and pass the driving exam. In the same way, it doesn't matter how a person feels about their gender. Feelings can change. A person's body gives the correct answer and that is what should appear on every Indiana Driver's License.

Subject: Drivers Licenses - Please!!!

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Indiana BMV,

Please do not cave into LGBTQ pressure!!! I do NOT want Indiana BMV revamp all 4.5 million driver's licenses to appease a handful of gender confused Hoosiers who want to choose the sex on their license to fit their mental viewpoint.

Driver's licenses are not supposed to be political statements about lifestyle choices.

Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.

Allowing false data on Indiana's driver's licenses compromises the integrity of the license.

The form to change one's gender has no guidelines for what that means or involves. It is merely a doctor's signature.

There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves.

Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity/fantasy.

Gender is not something someone can truly change through synthetic chemicals or disfiguring surgeries. Yet, the **proposed rule** from the BMV allows a doctor to simply sign a form attesting that a person has changed their sex from male to female, female to male or either to "X non-binary" as if sex is something fluid or unknown.

This LGBTQ insanity has caused me to write my first letter to the Indiana government. There are millions of sleeping Hoosiers that are finally waking up to this insanity.

Respectfully,
Will Austin

To whom it may concern:

I sincerely hope that you will not buy into this ridiculous idea that human beings can “choose” what sex they identify as and allow them to have chosen sex displayed on their drivers license. No matter what kind of chemicals a person ingests or what kind of surgery one has, we were born male or female and that’s a fact that can’t be changed or manipulated. It is absolutely crazy to give into an ideology of a small group of confused individuals. Please use common sense on this. The drivers license should state what sex the person is at birth, not what they “think” they are.

Sincerely,
Kim Carter

BMW director,

I strongly disapprove of any plans to add other choices to “male” and “female” to Indiana driver’s licenses. The current configuration is sufficient for legal and biological purposes of identification and does not impede how someone lives out their private life. Drivers licenses are not the place to satisfy a person’s confused state of mind, for what is clearly a very small percentage of the general population.

- There are only two biological sexes fixed at conception, regardless of how individuals choose to characterize themselves.
- Requiring a person to identify their true biology from birth does not prevent someone from living out a male or female identity.
- Driver's licenses are not supposed to be political statements about lifestyle choices.
- Emergency medical and law enforcement personnel need to know a person's actual biological sex to perform their duty in the event of an accident.
- Allowing false data on Indiana's driver's licenses compromises the integrity of the license.
- The form to change one’s gender has no guidelines for what that means or involves. It is merely a doctor's signature.

Respectfully,

Jerry Ross
